PERSONAL PROFILE

Software Engineer with over five years of professional experience designing and developing scalable backend systems, workflow automation platforms, and enterprise document management solutions. Strong expertise in Python, Django, REST APIs, and modern web technologies, with hands-on experience integrating AI-powered automation using OCR and GPT-based systems. Experienced in building secure enterprise applications, system integrations, and high-performance backend architectures. Highly motivated to pursue a Master's degree to deepen expertise in intelligent software systems, enterprise architecture, and applied artificial intelligence.

WORK EXPERIENCE

Senior Software Engineer

Innoweb Ltd. (Robo2mation)

Dec 2022 – Present

Dhaka, Bangladesh

- Design and develop backend and frontend components for enterprise workflow automation and document management platforms using Django, JavaScript, jQuery, HTML5, CSS3, and Bootstrap.
- Implemented intelligent document processing pipelines using OCR and GPT-based automation to extract, classify, and process enterprise documents.
- Designed scalable REST APIs and backend architectures supporting complex enterprise workflows and secure data processing.
- Integrated enterprise authentication and directory services including LDAP and SSO for secure system access.
- Resolved application security vulnerabilities identified through VAPT assessments and implemented secure coding practices.
- Delivered major client-specific features by converting complex business workflows into scalable, secure software solutions; contributed to the mobile app (Flutter) for extended platform reach.
- Collaborated with DevOps teams to deploy containerized applications using Docker and CI/CD pipelines.
- Mentored junior developers, conducted code reviews, and contributed to architectural discussions for scalable systems.

Junior Software Engineer

PyronLab

Oct 2020 – Nov 2022

Dhaka, Bangladesh

- Developed backend services and frontend interfaces for commercial web applications using Django, JavaScript, and jQuery.
- Maintained and enhanced a production web platform (nanaya.co) owned by a USA-based client, focused on personality assessments, relationship compatibility tests, campaigns, and survey systems.
- Implemented new features and resolved complex bugs while improving system stability and performance.
- Built scalable RESTful APIs and implemented core business logic for production systems.
- Deployed and maintained applications on Linux-based infrastructure using DigitalOcean and Nginx.
- Improved performance and reliability through debugging, refactoring, and system optimization.

EDUCATION AND TRAINING

Bachelor of Science in Computer Science and Engineering
United International University

2015 – 2019
Dhaka, Bangladesh

- CGPA: 3.04 / 4.00
- Recipient of multiple merit-based academic scholarships (50% and 25%).

Higher Secondary Certificate (Science)
Cambrian School & College

2011 – 2013
Dhaka, Bangladesh

- GPA: 5.00 / 5.00

Secondary School Certificate (Science)
Dhalla Union Council High School

2009 – 2011
Singair, Bangladesh

- GPA: 4.88 / 5.00

PROJECTS

AI Question Generator — Personal Project

- Developing an AI-powered system that automatically generates examination questions from academic text using GPT-based language models.
- Designed backend services using Django and REST APIs to process input content and generate structured question outputs.
- Supports multiple question formats including MCQ, short-answer, and descriptive questions.
- Provides JSON-based export for integration with digital examination systems and learning platforms.

Blood Donation Management System — Undergraduate Capstone Project

- Led development of a web-based platform connecting blood donors, recipients, and hospitals.
- Designed system architecture including ERD, DFD, and database schema.
- Prepared full technical documentation and coordinated implementation.
- Successfully defended the project before the faculty evaluation board.

Digital Book Shop — Software Engineering Laboratory

- Developed an e-commerce platform as part of a two-member development team.
- Implemented authentication, product management, and secure transaction functionality.
- Achieved a final course grade of 4.0 / 4.0.

TECHNICAL SKILLS

- **Backend:** Python, Django, Django REST Framework, Celery, Redis, Elasticsearch, OpenAI GPT API, Tesseract OCR, REST API Design
- **Frontend:** JavaScript, jQuery, Vue.js, Next.js, HTML5, CSS3, Bootstrap, Flutter
- **Programming Languages:** Python, Dart, C, Kotlin
- **Databases:** PostgreSQL, MySQL, SQLite, MongoDB
- **DevOps & Tools:** Docker, Git, GitHub Actions, Ubuntu, Nginx, Unicorn
- **Security:** LDAP/SSO, REST API security, VAPT remediation

HONOURS AND AWARDS

- Multiple university merit-based scholarships
- Government talent-pool scholarships
- First position at regional level in Primary School Scholarship examination

CERTIFICATES

- Python and Django for Web and API Development — CDIP

EXTRA-CURRICULAR ACTIVITIES

- Active member of the UIU Literature and Writers' Forum (UIULWF).
- Assisted in organizing literary events, academic discussions, and collaborative study sessions.
- Coordinated communication between the forum and university administration.

LANGUAGES

- Bengali — Native proficiency
- English — Professional proficiency in academic and technical communication
