Professional Summary

Software Engineer with **6 years of experience** building enterprise applications, workflow automation platforms, and API-driven systems with **Python/Django**. Works across backend and frontend development, third-party integrations, and deployment, and now applies that experience to AI as **sole owner of an LLM-powered assistant** for the Robo2mation workflow platform.

Technical Skills

Backend: Python, Django, Django REST Framework, FastAPI, Flask, PostgreSQL, MySQL, Elasticsearch, Celery, Redis, REST APIs, Pydantic, SQLAlchemy

Applied AI: LLM integration (cloud, Ollama), LangChain, LangGraph, structured JSON output, OCR/vision extraction, grounded Q&A, RAG (in progress)

Security & Access: Role-based access control, LDAP/SSO, OAuth 2.0, JWT, VAPT remediation, encryption of credentials at rest

Frontend & Mobile: JavaScript, jQuery, Vue.js, HTML5, CSS3, Bootstrap, Flutter/Dart (contributions)

DevOps & Tools: Docker, Linux (Ubuntu), Nginx, Gunicorn, DigitalOcean, Git, pytest, Postman, AI-assisted development (Claude Code, Codex)

Professional Experience

DataFort Limited · Dhaka, Bangladesh — **Dec 2022 – Present**

Software Engineer · Jul 2024 – Present

Mid-Level Software Engineer · Dec 2022 – Jun 2024

Product: Robo2mation — enterprise platform that digitizes business processes, approvals, and documents through configurable workflows.

- Developed **no-code configuration features** (dynamic eForms, Master Tables, business rules, API connectors) so client requirements are met by configuration instead of custom code, and extended the **workflow engine's** approval routing, task assignment and delegation.
- Developed **document-management** features (uploads, metadata, versioning, sharing, **Elasticsearch** search), **DRF APIs**, REST/XML/JSON integrations with client systems, and **Celery/Redis** background jobs.
- Implemented **role-based permissions and LDAP/SSO** for enterprise clients; fixed **VAPT** security findings.
- Diagnosed and resolved production stability and performance issues; worked with DevOps on releases and data migrations; built the matching JavaScript/jQuery UIs (form builder, dashboards, reports) and contributed Flutter mobile features.

PyronLab · Dhaka, Bangladesh — **Oct 2020 – Nov 2022**

Junior Software Engineer

- Built and maintained commercial web apps (**nanaya.co, Imarat.com.bd, PyronConverter, ChangeUnit**) with Django, REST APIs, jQuery and Vue.js, and deployed and supported them in production on DigitalOcean (Nginx, Gunicorn).

AI Engineering Projects

Robo2mation AI Actions — AI Assistant for Workflows · DataFort · sole owner · in development — Django · LangChain · LangGraph · OCR

An AI assistant inside our workflow product. It extracts data from uploaded documents to fill in forms, checks invoices against orders, summarises tasks, and answers questions about a request. Users approve every AI suggestion.

Mail2Record — Email-to-Records Automation — Django · PostgreSQL · Ollama

Turns order and shipment emails into structured records. It extracts data from the email and its attachments, lets people review it, and exports it to Excel or CSV.

EduNova — AI Learning Platform · in development — FastAPI · PostgreSQL · RAG

A learning platform built around textbooks. Students can ask questions about a book and get AI-generated practice questions.

Education

B.Sc. in Computer Science & Engineering — **Dec 2019**

United International University, Dhaka · Multiple merit-based scholarships

Professional Certificate: Python and Django for Web and API Development · CDIP (4-month program) — **2020**

Languages: Bengali (native), English (professional working proficiency, CEFR B2)
